**Firefox:** <http://support.mozilla.org/en-US/products/firefox/privacy-and-security/cookies>

If your Internet browser is not listed above or addressed by the links or you otherwise are having difficulties with the links, you may:

- Delete existing browser cookies through the “Internet Options”, “Settings”, “Preferences”, “Options” or similar menu selection in your browser’s menu or otherwise as directed by your browser’s support feature, which means that all pre-existing browser cookies are deleted but does not prevent browser cookies from being used in the future; and/or
- Disable future browser cookies through the same browser controls which means that browser cookies shall not be used in the future but pre-existing browser cookies shall not be deleted. Additional information on enabling or disabling browser cookies and other Tracking Technologies may be available through your browser’s support feature. (See the “help” section of your browser for more information.) Disabling may sometimes be referred to as blocking or opting out of browser cookies and relies on browser cookies to remember your choices. If you delete browser cookies using the controls in your Web browser (as described above) after disabling browser cookies, you may have to disable browser cookies again to re-establish your preferences; and/or
- Choose to have the Device you use to access the Site warn you each time a browser cookie or certain other non-Flash LSO Tracking Technology is being set. (You can later choose to turn-off such warnings.) This is done through your Internet browser on the Device you use to access the Site. Additional information on warnings and removal of warnings may be available through your browser’s support feature.

The above options may cover browser cookies set by the Site, browser cookies not set by the Site (sometimes called third party cookies) and/or both types of browser cookies. **THESE BROWSER COOKIE CONTROLS ARE DIFFERENT FROM DO NOT TRACK OPTIONS THAT MAY ALSO BE OFFERED BY CERTAIN BROWSERS.**
